

# HÜLLER HILLE

## Solid. Precise. Customised.

HÜLLER HILLE has been making machining centres for heavy-duty machining for over 70 years.

Our employees know how precision works in the international market.

We are seeking to recruit the following role at the earliest opportunity:

# Head of Electrical Design [m|f|d]

with responsibility for hardware and software development [full-time]

## Job description

- + Manage electrical design for hardware and software
- + Responsible for successful project implementation reporting directly to the technical director
- + Point of contact for mechanical design, work scheduling, service and assembly | installation
- + Prepare and develop concepts and define hardware and software standards in conjunction with colleagues
- + Manage and implement hardware and software projects while adhering to time constraints, budget and quality standards, including internal departmental scheduling and tracking
- + Follow current trends in software development in the areas of machine tools, technologies and processes

## Your profile

- + Successfully completed degree in electrical engineering or comparable technical training
- + Electrical | automation engineering with many years of experience in electrical design
- + Many years of experience in the field of machine tool automation
- + Management experience as team, group or project manager (m|f|d)
- + Experience of using EPLAN Electric P8 and Siemens 840 D SL, Fanuc 3x and Heidenhain ITNC 640 NC controls
- + Strong communication skills, highly motivated and persuasive with a constructive approach, able to negotiate confidently in English

**We look forward to receiving your application.**
